

Profile Summary

Data Scientist with a Mechanical Engineering background, skilled in building AI solutions for computer vision, NLP, and real-time analytics. Experienced in deep learning, Large Language Models, and deploying end-to-end models using YOLO and Streamlit to improve operational efficiency and user experience.

Work Experience

DATA SCIENCE INTERN

INLIGHN Tech

Oct 10, 2025 – Dec 10, 2025

- Developed ANAKIN, a real-time AI voice assistant integrating Speech-to-Text, Text-to-Speech, OpenCV-based camera automation, and Groq Llama-3.1-8B-Instant for intelligent conversational responses; deployed via a fully interactive Streamlit web application.
- Developed multiple end-to-end machine learning applications, including Heart Disease Risk Prediction, Microsoft Stock Price Forecasting, Bitcoin Price Prediction, and Fake News Detection, using Scikit-learn, TensorFlow, XGBoost, and real-time API integrations.
- Implemented end-to-end machine learning pipelines encompassing data cleaning, feature engineering, exploratory data analysis (EDA), model selection and comparison, hyperparameter tuning, and model explainability, with all solutions deployed as Streamlit dashboards for real-time inference.

DATA SCIENCE INTERN

INNODATATICS

May 2024 - June 2024

Text Emotion Analysis - LLM

- Built an LLM-driven text evaluation system performing 16-emotion classification, grammar scoring, and filler word detection with BLEU 45.12 and ROUGE-L 67.35.
- Implemented a Streamlit + PostgreSQL application, increasing communication-analysis efficiency by 20% and reducing manual review time by 50%.

Bird Detection and Tracking for Healthcare Monitoring

August 2023 - Sept 2023

- Trained a YOLOv8x model on 4,981 labeled chick images, including age-based categories (7, 14, and 21 days), achieving 0.96 Precision/Recall/F1 and 0.95 mAP@0.5 for highly accurate chick detection.
- Integrated real-time video analytics using OpenCV, improving operational efficiency by 20% and reducing manual workload by 15% through automated health monitoring, and deployed the complete system using Flask for local and on-premise use.

Education

Bachelor of Engineering(Mechanical)

New Horizon College of Engineering

VTU

August 2014 - June 2021

Certifications

Data Science – NASSCOM

Oct 2023

Professional Skill

Deep Learning, LLMs, Object Detection, TensorFlow, PyTorch, YOLOv8, Streamlit, GitHub, Microsoft Power BI, NLP, OpenCV-based, PyCharm, Python, Pandas, NumPy, Matplotlib, Scikit-Learn, XGBoost, NLTK, Streamlit, Hugging Face, MySQL, Power BI, Draw.io
